USIS database

United States Information Systems (USIS) consist of the aggregation of data from two databases: the legacy Integrated Management Information System (IMIS) and its next generation replacement, the OSHA Information System (OIS). These are U.S. databases of industrial hygiene measurements managed by the OSHA (Occupational Safety and Health Administration), a regulatory agency of the United States Department of Labor, as part of its compliance monitoring program. These databases contain information about inspections conducted by both federal and state agencies. Data in IMIS is restricted to enforcement, consultation, and whistleblower information. OIS is a single comprehensive system for all program and regulatory practice. It includes enforcement, consultation, voluntary protection program evaluations, homeland security response and recovery activity, compliance assistance, partnerships, and whistleblower information. The data available relates to the period 1971-2015 in IMIS and to the period 2011-2021 in OIS.

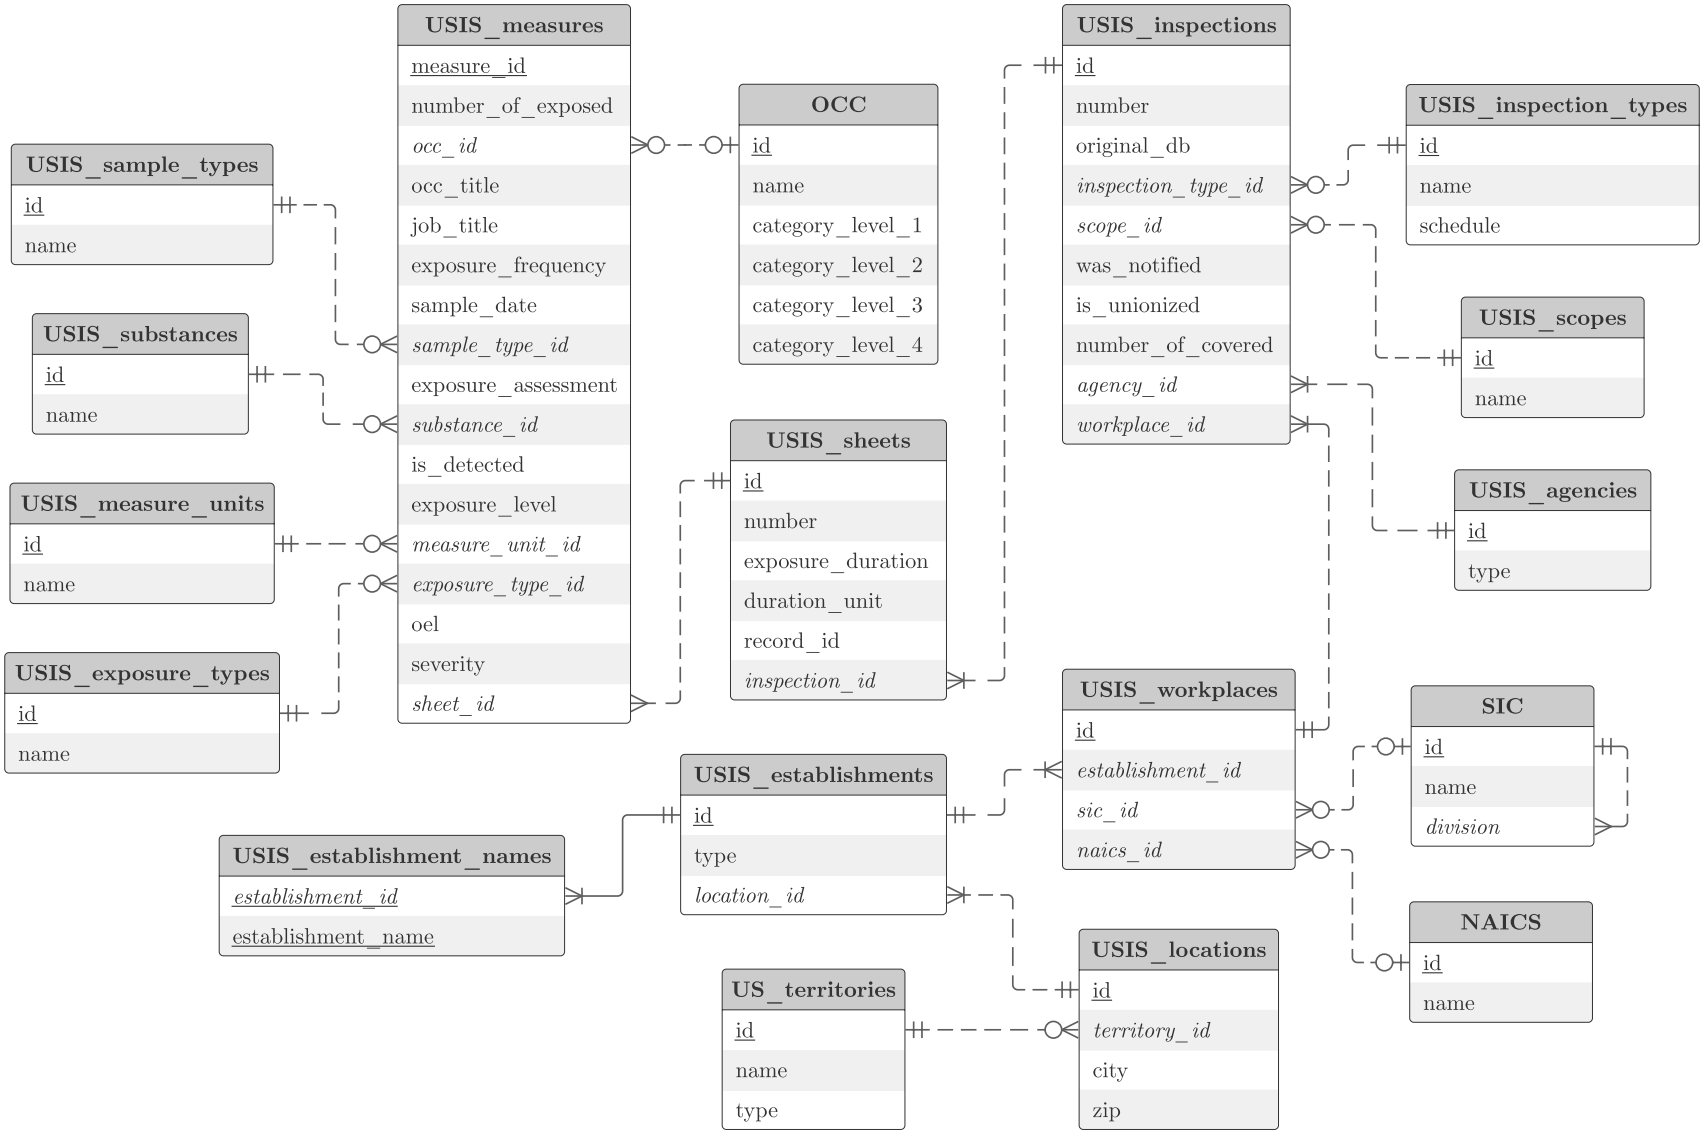

Figure 1: USIS database relational schema.

Table 1: Description of USIS main variables.

Variable	Definition	Type	Comments
measure_id	Identifier of the measure.	Integer	
inspection_id	Identifier of the inspection.	Integer	
original_db	Original database of the data.	Enumeration	Can be either "IMIS" or "OIS".
inspection_type_id	Identifier of the inspection type.	Enumeration	See appendix A.
scope_id	Identifier of the inspection scope.	Enumeration	See appendix B.
was_notified	Indicates whether advance notice of the inspection was given to the establishment inspected.	Boolean	Only in IMIS data.
is_unionized	Indicates whether employees covered by inspection are affiliated with a union.	Boolean	
number_of_covered	Number of employees covered by the inspection.	Integer	Only in OIS data.
agency_id	Identifier of the agency responsible for the inspection.	String	
agency_type	Type of the agency responsible for the inspection.	Enumeration	See appendix C.
workplace_id	Identifier of the workplace where the inspection was conducted.	Integer	
establishment_id	Identifier of the establishment inspected.	String	
establishment_type	Type of the establishment inspected.	Enumeration	See appendix C.
location_id	Identifier of the location of the establishment inspected.	String	
territory_id	Identifier of the U.S. territory corresponding to the location.	Enumeration	See appendix D.
city	City corresponding to the location.	String	
zip	Postal code corresponding to the location.	String	
sic_id	Identifier of the industry, according to the U.S. Standard Industrial Classification of 1987.	String	• Only in IMIS data. • See the related industry classification reference document.

Table 1: Description of USIS main variables.

Variable	Definition	Type	Comments
naics_id	Identifier of the industry, according to the North American Industry Classification System of 2002.	String	See this extract of the related industry classification reference document.
sheet_id	Identifier of the sample sheet to which the measure is attached.	Integer	
sheet_number	Number of the sample sheet.	Integer	
exposure_duration	Duration of time the hazard has existed.	Real	Only in OIS data.
duration_unit	Unit of the exposure duration.	Enumeration	• Only in OIS data. • See appendix E.
record_id	Identifier of the related exposure record, identifying the area or employee sampled.	Integer	Only in OIS data.
number_of_exposed	Number of employees exposed to the hazard.	Integer	Only in IMIS data.
occ_id	Identifier of the occupation of the employee sampled, or of the employee the most at risk from exposure, according to the U.S. census occupational classification system of 1980.	String	• Only in IMIS data. • See this appendix of a related documentation about census data.
occ_title	Occupation title of the employee sampled, or of the employee the most at risk from exposure, according to the U.S. census occupational classification system.	String	Only in OIS data.
job_title	Descriptive job title of the employee being sampled, or of the employee the most at risk from exposure.	String	
exposure_frequency	Frequency of exposure for all exposed employees.	String	
sample_date	Sampling date.	Date	Format: YYYY-MM-DD.
sample_type_id	Identifier of the type of sample taken.	Enumeration	See appendix F.
exposure_assessment	Identifier of an exposure assessment.	Integer	Only in OIS data.
substance_id	Identifier of the sampled substance.	String	See appendix G.

Table 1: Description of USIS main variables.

Variable	Definition	Type	Comments
is_detected	Indicates whether the sampled substance has been detected.	Boolean	
exposure_level	Concentration, level of exposure.	Real	
measure_unit_id	Identifier of the unit of the measure in which the exposure level and the OEL are expressed.	Enumeration	See appendix E.
exposure_type_id	Identifier of the type of exposure reported.	Enumeration	See appendix F.
oel	Occupational Exposure Limit corresponding to the type of exposure and to the sampled substance.	Real	
severity	The severity of exposure. It corresponds to the exposure level with regard to the exposure limit.	Real
